CONDENSING UNITS

COLD ROOMS

Cold Room

The ambient where you control the humidity and the temperature is being called cold room which is isolated from outdoors to keep and to stock the food products for longer period. Cold Rooms slow down the chemical enzyme reaction and prevent micro-organisms to live and to reproduce on the food products.

CENTRAL CONDENSING UNITS

Technical Details

- * Hermatic Semi-Hermatic or Scroll Compressor
- * Oil Tank, Oil Seperator, Oil Pressure Stabilizer Valve
- * Suction and Pressing Lines Vibration Absorbers
- * Pressure Control Switches
- * High capacity Coolant Tank
- * Check Valves and Ball Valves

SPLIT SYSTEMS

ECO UNITS

Optional Features

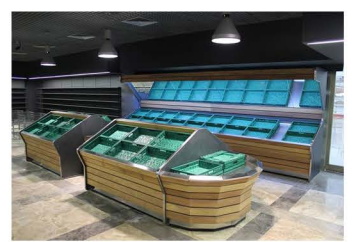

- * Inverter System which provides 25% Energy Saving
- * Acoustic Isolation
- * Fan Cycle Control
- * Fan Inverter
- * Custom Made Desing

Advantages

- * Low Investment Cost
- * High Efficiency and Cooling Capacity
- * Space Saving Desing
- * All Units can be watched locally with a Macro Processor
- * Easiness both in Installation and Maintenance
- * Continous Refrigeration
